

WELCOME to OJI ZOO

Welcome to Oji Zoo

Panda House

Giant Pandas have been bred here since the year 2000 as part of the Japan-China collaborative research project. Find out more about rare giant pandas, the protection and preservation of the species as well as conservation of their natural environment.

Zoological Science Center

You can see the skeletal structure of elephants and giraffes and enjoy the six exhibition zones in the Center. Includes a exhibit room, "Animal Restaurant" (where you can learn about a variety of feed, etc.), and enjoy learning about the characteristics and lifestyle of wild animals. Facilities also include a hall and library. From the rest area you can observe penguins and their life under the water.

Big Cats Circle

Here you can see 5 different species of big cats such as tigers and lions. Through the glass you can observe the wild animals in an environment which comes close to their natural habitat, made using natural trees and rocks.

Polar Bear House

Using waterfalls and imitation rocks we have reproduced an environment close to the polar bear's natural habitat. You can observe the bear's life both on the ground and under water.

Children and Animal's Land

There are a lot of interesting areas you can walk through such as the Koala House and the Squirrel and Birds Forest. You can see up close the cute things that the otters and lesser pandas do. At the Children's Zoo goats, sheep, geese and other animals run free, and you can touch rabbits and guinea pigs.

Foreign Settlement, Former Hunter's residence

(Important Cultural Property designated by the national government)
The building is opened to the public in April, May and October.

Commemorative stamp
